

# Vertical Blinds

89mm & 127mm

Vertical Blinds are available in two sizes of vane and a wide range of colours and finishes to match or compliment any interior décor. These blinds offer effective shade and can cover in excess of 16m<sup>2</sup> allowing a very large area to be shaded by a small number of blinds. Their light weight also makes them ideal for areas where structural strength is lacking.

The use of 89mm vanes is recommended for small windows or where the fitting needs to be as close to the window as possible. The wider 127mm vanes are more economic as each one covers a wider area, meaning fewer vanes per metre and less parts in the operating mechanism.

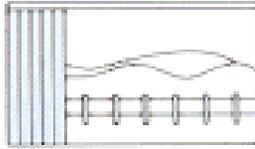

Both sizes use the same aluminium head rail, which gives tilt by chain and draw by cord operation as can be seen in this diagram.

Whilst our standard head rail is suitable for all applications, heavy duty versions, some of which can be operated electrically, are available as an option.

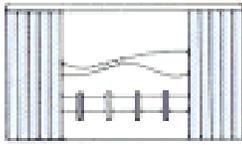

A wide variety of brackets is available, allowing top or face fixing in most situations.

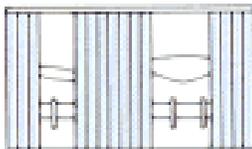

## Vertical Control Options

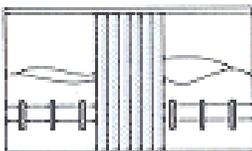

One Way

Split

Two Blinds on  
One Track

Centre

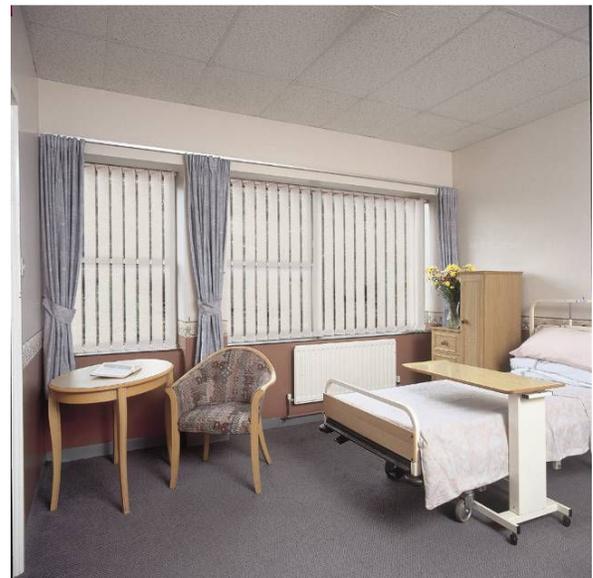

Four options are available for the opening of our Vertical Blinds, as can be seen in this diagram. The control cord and chain can be placed at either end of the headrail and can be any length, to suit the application. If the windows are very high, long controls can be fitted to ease operation, conversely, if children or other vulnerable people are to use the area, short controls can be made to keep them out of reach.

## Special Shapes

We are able to shape vertical blinds to fit around obstructions such as Air-Conditioning units or to cope with sloping tops to the windows. Special louvre hanger attachments allow us to use these blinds on windows which slope at up to 45°.

## Macassar Vertical Size Chart

| Vane Size | Minimum Width (mm) | Maximum Width (mm) | Maximum Drop (mm) |
|-----------|--------------------|--------------------|-------------------|
| 89mm      | 160                | 4570               | 3550              |
| 127mm     | 240                | 4570               | 3550              |

Longer drops are available on request. Please ask for a quotation.

## Vertical Blind Cleaning

Cleaning of Venetian Blinds can be achieved in three ways.

1. Careful use of a vacuum cleaner with the soft brush attached.
2. Wipe clean with a damp cloth.
3. Machine wash at 40<sup>0</sup> – subject to fabric, please refer to fabric specification.

## Flame Retardancy

All Macassar Blinds Contract fabrics meet current flame Retardancy regulations.
