

# Woodslat Venetians

25mm, 35mm & 50mm

Macassar Blinds manufacture our own range of Woodslat Venetian Blinds available in a wide range of colours to suit all tastes and interiors.

We use wood which is sourced from sustainable forests. The wood is kiln dried to make it less susceptible to temperature and moisture changes. However, wood is a natural material so variations to shade, colour and graining may occur.

To provide a strong foundation for our blinds, all Woodslat Venetians use a 51mm x 57mm headbox.

The use of 25mm slats is especially recommended for small windows and openings. A range of brackets is available to accommodate top, face and side fixing. The bottom bar and valance are colour matched to the slats, giving a fully co-ordinated look. Mitred returns are available for the valance, if the blind is fitted outside the recess.

Our made-to-measure wooden blinds are manufactured with ladder lace as standard, woven tapes are available as a cost option. These are 25mm wide, the colour is dictated by the shade of wood chosen, or can be specified from our range.

Woodslat Venetian Blinds enhance any interior with their inherent beauty. They blend well with more traditional colour schemes, yet add visual interest to modern minimalist designs.

Although usually used to dress windows, these blinds can be used as room dividers if required.

The blinds can be cleaned using the soft brush attachment on a vacuum cleaner or a venetian blind cleaning brush.

## Woodslat Venetian Size Chart

Minimum Width (mm)	350
Maximum Width (mm)	2362
Maximum Drop (mm)	2438

Blinds outside of the parameters shown above are available, please ask for our recommendations.

## Approximate Stacking Depth

Blind Drop (mm)	Stacking Depth (mm)	
	50mm Slat	25mm Slat
609	120	155
914	145	210
1219	170	260
1523	195	315
1828	220	365
2133	245	420
2438	270	470

## Woodslat Venetian Control Options

Blinds are supplied with cord tilt mechanism only

Height control on right,  
angle control on left

Height control on left,  
angle control on right

Height control and angle control on right

Height control and angle control on left

## Flame Retardancy

The wood can be treated to meet current flame retardancy regulations. We also have available, in a range of 8 colours, Woodstyle Blinds which use an expanded foam for the core of the slat with a laminated cover. This material is certified as Flame Retardant.
